

Portfolio Redesign & Enhancement — PRD

Farhan Arshad — Full Stack Developer Portfolio

Document Purpose: Provide an implementation-ready specification for redesigning the existing portfolio with a natural, professional visual identity and the requested navigation, hero, about, contact, social-link, CV-download, and HTML title changes.

1. Product Overview

The portfolio should present Farhan Arshad as a professional Full Stack Developer. The redesign should feel human-designed, modern, distinctive, and polished rather than looking like a generic AI-generated template. The interface should prioritize readability, clear hierarchy, strong typography, restrained motion, and a cohesive color system.

2. Primary Design Direction

Requirement: Replace the current portfolio theme with a new attractive color scheme. Avoid the typical AI-looking neon green/blue/purple treatment. Use a sophisticated, developer-focused palette with one strong accent and neutral surfaces.

Suggested direction: warm off-white/light neutral background, deep charcoal text, muted navy/indigo or burgundy accent, subtle borders, and restrained hover states. The final colors may be adjusted by the implementer as long as the result remains natural, professional, and visually distinctive.

3. Navigation Bar

ID	Requirement	Acceptance Criteria
NAV-01	Remove animated green and blue dots.	No animated green/blue status dots are visible in the navbar.
NAV-02	Preserve a clean navigation structure.	Navigation remains readable and responsive on desktop/mobile.

4. Hero Section

ID	Requirement	Acceptance Criteria
HERO-01	Remove green dot from main hero.	No green decorative/status dot appears in hero.
HERO-02	Remove side icon/emoji next to Lahore, Pakistan (Available Remote Work) without an icon or emoji.	Text "(Available Remote Work)" appears without an icon or emoji.
HERO-03	Remove emoji/icon before role text such as "Full Stack Specialist".	Text "Full Stack Specialist" appears in clean text without decorative emoji icons.
HERO-04	Change "Hire Me" to "Download CV".	Button label is exactly "Download CV".
HERO-05	CV button downloads the user's CV.	Clicking Download CV triggers a direct CV download.
HERO-06	Adjust button layout.	Email/contact action and its icon appear above; Download CV and Explore Projects appear below.

5. About Section

Requirement	Implementation
Heading	Change heading from "About Farhan Arshad" to "About me".
Right-side green component	Remove the green component containing "Open for Select Contracts, Hire Me & Full-Time Roles".

Section styling	Keep the section clean and aligned with the new portfolio theme.
-----------------	--

6. Section/Card Simplification

Remove the round decorative boxes/background cards associated with the following section labels:

BACKGROUND & EXPERIENCE, TECHNICAL PROFICIENCY, WHAT I OFFER, FEATURED WORK, CAREER HISTORY, LET’S CONNECT. These labels/content should instead use a flatter, cleaner layout integrated into the page design.

7. Contact Section

Under the contact area, remove the yellow emoji/icon from the “Direct Contact” component. The heading should remain text-based and professional.

8. Social & External Links

Platform	Destination	Behavior
LinkedIn	https://www.linkedin.com/in/farhan-arshad-aa5991370/	Open Farhan Arshad's LinkedIn profile.
GitHub	https://github.com/FarhanArshad80	Open Farhan Arshad's GitHub profile.

The relevant LinkedIn/GitHub buttons or icons should be clickable and point to the exact URLs above.

9. CV Download

Requirement: Provide the CV as a downloadable portfolio asset and connect it to the “Download CV” hero button.

Implementation: Place the CV PDF in the project's public/static assets (for example, */public/Farhan-Arshad-CV.pdf*) and configure the button as a download link. The implementation should not depend on a local developer filesystem path.

Acceptance Criteria: The CV file loads successfully in production; clicking “Download CV” downloads or opens the correct CV; the filename is professional; there are no broken links.

CV placeholder: The actual CV PDF must be supplied by Farhan Arshad and added to the project assets. This PRD does not invent or fabricate CV content.

10. HTML Page Title

Current title: My Google AI Studio

New title: Farhan Arshad Full Stack Developer

Update the document title in the HTML/head metadata so browser tabs and search previews use the new title.

11. Functional Acceptance Checklist

- New natural, professional, non-generic color theme applied throughout portfolio.
- Navbar green/blue animated dots removed.
- Hero green dot removed.
- Location/remote line has no side emoji/icon.
- Role text has no preceding emoji/icon.
- “Hire Me” changed to “Download CV”.
- Download CV downloads the supplied CV PDF.
- Email/contact action is positioned above the lower action buttons.
- Download CV and Explore Projects are positioned below.
- About heading reads “About me”.
- Green hiring/status component removed from About section.
- Decorative round boxes removed from specified sections.
- Yellow emoji removed from Direct Contact.
- LinkedIn button/link points to the supplied LinkedIn profile.
- GitHub button/link points to the supplied GitHub profile.
- HTML title changed to “Farhan Arshad Full Stack Developer”.
- Responsive layout verified on desktop and mobile.
- No broken links, missing assets, or console errors.

12. Deliverables

- Updated portfolio UI and visual theme.
- Cleaned navbar and hero section.
- Updated About and Contact sections.
- Working LinkedIn and GitHub links.
- Working CV download button connected to the supplied CV PDF.
- Updated HTML page title.
- Responsive and production-ready implementation.

13. Priority

High priority: Theme redesign, hero CTA/CV download, navigation/hero cleanup, About/Contact cleanup, social links, and page title.

Quality requirement: The finished portfolio should look intentionally designed by a human, with restrained decorative elements and consistent spacing, typography, and color usage.
